
Poster Competition

Jean-Gabriel Contamin and PhD Students

Abstract

A poster competition will be organised during the conference. As in Wageningen, the selection of the best posters will be conducted by conference participants themselves.

If you wish to participate in the contest to present your doctoral work, you have to make a proposal in this panel.

Your submission should include

- your name, institutional affiliation and email
- title of your doctoral work
- your career stage (e.g., year of your PhD studies, year PhD dissertation defense is anticipated, year of post-doc work and date PhD was received, etc.)
- a brief description of your research project, the problems it treats, its field and its methodological approach.

Selected candidates would have to bring a copy of the poster and to send on month before the conference an image file so that the poster might be reproduced.
